# SERVICE PROFILE **ProtK**

# Feel safe....

## If there is a fire...

According to the Badan Pusat Statistik, the number of fires in DKI Jakarta keeps increasing each year with the main cause of fires being electrical short circuits. In 2019 losses in the Jakarta area alone due to fire reached IDR 137.8 billion<sup>1</sup> - not to mention losses in life and injuries to employees and loved ones.

## ...will your systems protect your people and your assets?

Fire safety systems are usually well designed and properly installed. However, Dieken<sup>2</sup> states that when facing a fire about one third of the safety systems do not work properly because of the lack of inspection, testing or maintenance.

An Edison Electrical Institute (EEI)<sup>3</sup> study found that 49 percent of the fire extinguishing systems installed failed during a fire incident every year. Unfortunately, this type of hidden failure is only revealed when a fire occurs.

**Don't take chances with your factory, your building, your people...  
your livelihood and the existence of your company could depend on it!**

## **We are Technical Experts**

PT ODG Nusantara Jaya is managed by PT ODG Indonesia, which has over 30 years fire experience in Indonesia. We are fire protection experts, with a focus on customer service and solving our customers' technical issues. We have installed fire systems in Factories, Embassies, High Rise Buildings, Mine Sites, Power Stations and Oil & Gas platforms. We are here to inspect, install, maintain and retrofit your fire systems.

## **We provide you with detailed information on the assets owned by your company**

Protk gives you a complete, uniquely tagged listing of all fire protection assets so that you have a thorough record of the equipment that you own. Over time, Protk will provide data and trends on asset failures as well as propose ways in which your systems can be more reliable or effective.

## **We give you the reporting you need to meet your insurance requirements**

Protk produces accurate and timely reports that enable your company to meet strict international insurance requirements.
